

## Portable HPGe Gamma-Ray Spectrometer (Liquid Nitrogen Cooled)

### Features

- Light weight aluminum construction
- Detection of radiation in any spatial orientation
- Compact low consuming electronics
- Available with HPGe Coaxial or Planar detector
- Transportation and storage without cooling
- Aluminum, Beryllium or Carbon-fiber input window

### Complete Set

- Portable HPGe Coaxial or Planar detector, Preamplifier with cooled input stage
- Digital or Analog Multi Channel Analyzer (regular or miniature)
- Analytical software for quantitative and qualitative analysis
- Portable Dewar vessel (from 1 liter to 7 liter)

Detection, accumulation and processing of gamma spectra in field and industry conditions where small dimension and weight of spectrometer are important.
